

# DC-CUP™

## THE STRONGEST AND THE LONGEST WEARING POLYURETHANE CUP FOR PIPELINE PIGS

### ACCEPT NO SUBSTITUTES

To insure unparalleled quality, the patented and proven DC Cup is manufactured exclusively by Knapp Polly Pig in Houston, Texas, USA; Monterrey, Mexico; and the Republic of Singapore.

### PATENTED SURFACE BEARING AREA DESIGN AND FLEX POINT OFFER THE MAXIMUM IN WEAR RESISTANCE AND SEALING ABILITY

The DC Cup has three times more wear surface in contact with the pipe wall for extended cup life. The Flex Point allows the wear surface to be held consistently in firm contact with the pipe wall for superior sealing.

### SUPERIOR SCRAPING EDGE

The DC Cup's patented Scraping Edge provides the ultimate design for removing deposits from the pipe wall. The disc-like edge presented to the pipe wall offers a significant improvement in scraping ability over the standard rounded edge found on conventional cups.

### THE STRENGTH TO SUPPORT THE HEAVIEST INSPECTION TOOLS.

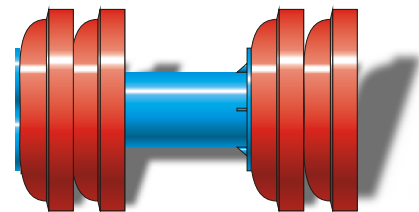

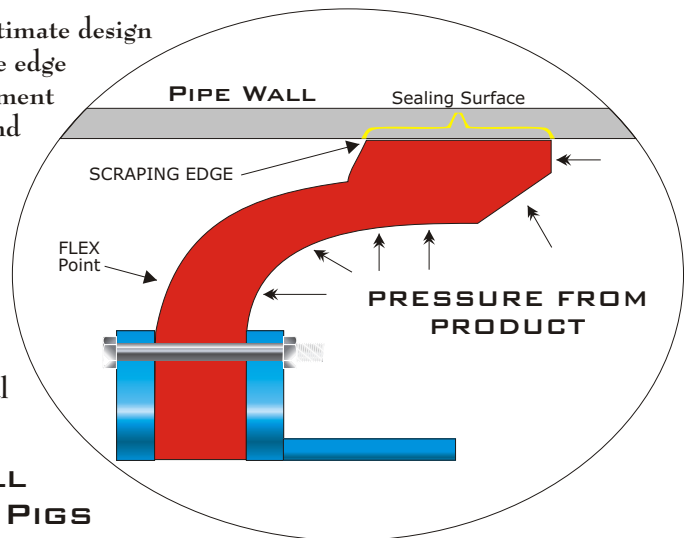

The DC Cup's patented design provides the pipeliner with a superior strength cup capable of supporting the weight of even the heaviest of the sophisticated internal inspection pigs.

### MOUNTING DIMENSIONS TO FIT ALL MANUFACTURER'S MANDREL-TYPE PIGS

The DC Cup is available with mounting dimensions to fit all mandrel pigs regardless of the original manufacturer. Dimensions such as the center hole diameter, the bolt circle diameter, and the number and size of bolts are specified by the customer to insure that the cups fit your pig.

### AVAILABLE IN ULTRATHANE™, THE ULTRA PERFORMANCE URETHANE

The patented DC Cup is available in a variety of custom-blended, high strength, long-wearing urethane formulations known as UltraThane™. The exact formulation is determined by the function that the pig is to perform, the length of the run and other job specific criteria.

THE KNAPP DC-CUP IS PATENTED IN THE UNITED STATES AND CANADA

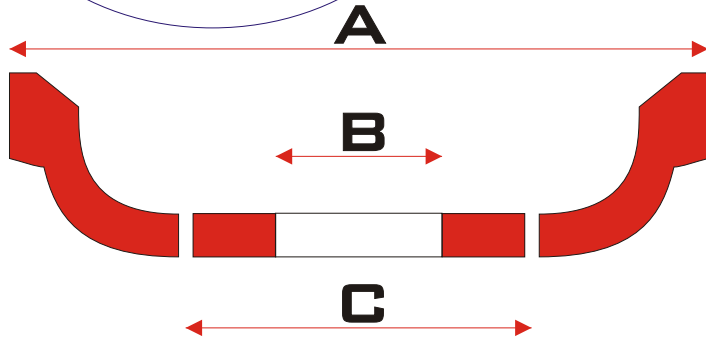

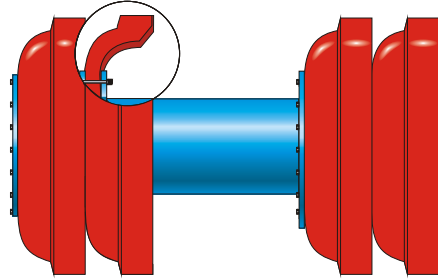

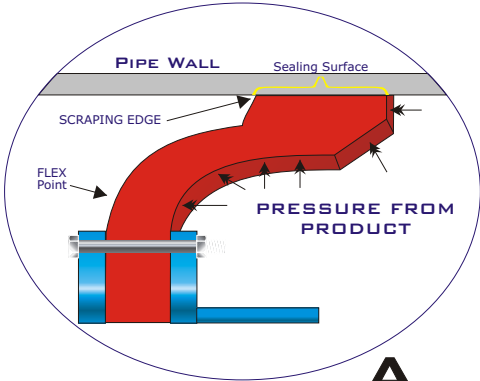

DC-CUP AND ULTRATHANE ARE REGISTERED TRADEMARKS OF KNAPP POLLY PIG, INC.
