

BLUE PLAIN SPIRAL POLLY PIG (BPS)

ALL POLYESTER POLYURETHANE FOAM
AND ELASTOMER. NO METAL PARTS!

Medium-density foam body
(5-8 lb/ft³ - 80-128 kg/m³)

The Knapp Blue Plain Spiral Polly Pig is used for short length runs in pipelines where extra abrasion resistance is required. The tough elastomer coating is still flexible enough to allow the pig to reduce to pass through minor cross-sectional reductions or restrictions. The Blue Plain Spiral Polly Pig is manufactured using Knapp's exclusive K-Lite™ polyurethane foam (5-8 lb/ft³ density); this tough, hi-flexibility, open-celled foam is particularly suited for the rugged environment encountered in modern pipelines.
