

CRIMSON CRISS CROSS SILICONE CARBIDE POLLY PIG (CCC-SC)

**ALL POLYESTER POLYURETHANE FOAM
AND ELASTOMER. NO METAL PARTS!**

**Heavy-density foam body
(8-10 lb/ft³ - 128-160 kg/m³)**

The Knapp Crimson Criss Cross Silicone Carbide Polly Pig is used to remove tough scale from pipe walls. It is manufactured using Knapp's exclusive K-Duro™ polyurethane foam (8-10 lb/ft³ density) and tough crimson coating for the maximum in wear resistance, along with chips of silicone carbide embedded in the coating for superior scrapin ability. Designed for shorter runs the Crimson Criss Cross Wire Brush, where there are little or no reductions in the pipe's cross-sectional area, the Crimson Criss Cross Silicone Carbide Pig offers the operator a flexible alternative to steel mandrel pigs. Contact Knapp or a qualified representative before using a Crimson Criss Cross Silicone Carbide where line reductions are present.

*Note: The CCC-SC Polly Pig should not be used in non-metallic piping as it will physically scratch the pipe wall, creating an anchor point for future scale or deposit formation
