

Maximum Cleaning Series

Maximum Cleaning Series are available in various densities and designs. The Super Javelina is totally covered with wire brush straps in a slight spiral pattern. The Power Brush™, totally coated with wire straps in a straight pattern design, allows sufficient by-pass to clean the brushes and suspend debris ahead of the cleaner. Both the Super Javelina and the Power Brush cleaners are designed for long runs. The Shark is totally coated with silicone carbide chips and are designed for shorter runs. The Stud Cleaner has steel studs embedded in durable foam for removing hard scales. (Use caution in using Maximum Cleaning Series pigs where short radius bends, reduced cross sectional conditions, and low flow rates are present).

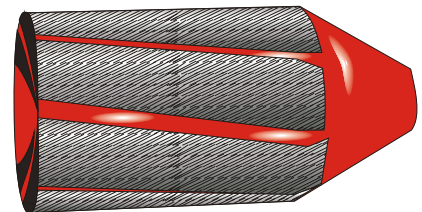

**Totally Coated Wire Brush
(TCWB)
Style 4, Type B**

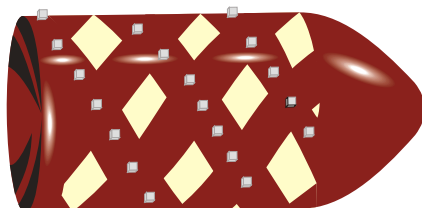

**Totally Coated,
Silicone Carbide
(TCSC)
