

RED MULTI-DIMENSIONAL POLLY PIG (RCC-MD)

ALL POLYESTER POLYURETHANE FOAM
AND ELASTOMER. NO METAL PARTS!

Medium-density foam body
(5-8 lb/ft³ - 80-128 kg/m³)

The Knapp Red Multi-Dimensional Polly Pig is used for medium length runs in pipelines where large reductions in pipe cross-sectional area are encountered.. The tough elastomer coating provides a flexible, yet highly abrasion resistant coating that allows the pig to reduce to pass through major cross-sectional reductions or restrictions and still clean the pipeline. It is still advisable for the pipeline operator to contact Knapp or a qualified representative before using the pig to ensure that the reduction is not too severe for safe passage. The Red Multi-Dimensional Polly Pig is manufactured using Knapp's exclusive K-Lite™ polyurethane foam (5-8 lb/ft³ density); this tough, hi-flexibility, open-celled foam is particularly suited for the rugged environment encountered in modern pipelines.
