

# **RED CRISS CROSS WIRE BRUSH POLLY PIG (RCC-WB)(JAVELINA)**

**Medium-density foam body  
(5-8 lb/ft<sup>3</sup> - 80-128 kg/m<sup>3</sup>)**

The Knapp Red Criss Cross Wire Brush Polly Pig is used for medium length runs in pipelines where an abrasive substance is required to remove deposits on the pipe wall. The Javelina is capable of negotiating elbows, tees, and wyes in the line. It is manufactured using Knapp's exclusive K-Lite™ polyurethane foam (5-8 lb/ft<sup>3</sup> density) and tough red coating for the maximum in wear resistance, along with spiral straps of flame-hardened wire brushes for maximum scraping. Designed for medium length pipeline runs with little or no reduction in cross-sectional area, the Red Criss Cross Wire Brush Polly Pig offers the operator a flexible, low-cost alternative to steel mandrel pigs. Contact Knapp or a qualified representative before using a Red Criss Cross Wire Brush where line reductions are present.

\*Note: The RCC-WB Polly Pig should not be used in non-metallic piping as it will physically scratch the pipe wall, creating an anchor point for future scale or deposit formation
